

ALCM

Think solvent types are your only choice?

THINK ALCM FIBER ASPHALT ROOF EMULSION

Save almost \$4 per pail vs. fiber roof coating

- Can be used for dampproofing below grade exterior walls
- Glass fibers added for strength
- No solvent odor
- Will not "alligator," run, or sag
- Brush-applied
- Excellent base coat for aluminums or white coatings

Use it on:

- | | |
|--|--|
| <input checked="" type="checkbox"/> asphalt roof surfaces | <input checked="" type="checkbox"/> damp surfaces |
| <input checked="" type="checkbox"/> metal | <input checked="" type="checkbox"/> concrete block |
| <input checked="" type="checkbox"/> APP or SBS smooth rolled roofing | <input checked="" type="checkbox"/> masonry |

ALCM Fiber Roof Emulsion Tips the Scale in Your Favor!

Fiber asphalt emulsion

- Lower cost
- Resists cracking
- Water clean up before dry
- Environmentally friendly
- UV resistant

Solvent type products

- Higher cost
- Less strength
- Solvent odor

Note: Fiber asphalt roof emulsion is subject to freezing and must be cured before being exposed to moisture.
