

Extrusion Operator

Location: Sidney, OH

Company Summary: Polyfill LLC supplies ethylene-based acoustical barrier materials to the Automotive, Commercial and Industrial Markets. We utilize base compounds to create a homogeneous blend of heavily-filled thermoplastic sheets, rolls and die cut parts that function as a barrier in acoustical applications. Common uses for our products include automotive carpet, dash insulators, hood liners and trunk systems.

Objective: Proficiently operate extruder machine in a safe manner necessary to manufacture a quality acoustical product for the automotive industry.

Responsibilities:

- Safely operate and keep clean any piece of equipment necessary for manufacturing acoustic products which conforms to quality requirements.
- Read, comprehend and execute processes and procedures according to the Standard Work Instructions which are necessary to properly operate the equipment and manufacture the product.
- Must complete and maintain all required paperwork necessary in the operation.
- Maintain all required paperwork including daily production reports, process parameters and production reports.

Requirements:

- Must have experience in extrusion
- Must be mechanically inclined
- High School Diploma/G.E.D.
- Must be able to read, write, and comprehend plant directives written in English
- Perform simple mathematics, including reading a tape measure. Comprehend and interpret process sheets and keep accurate account of materials used during manufacturing process including scrap amounts.

*Offers of employment will be contingent upon satisfactory results of medical exams, drug tests, and background checks.
